

NEWS SPLASH

Bypass Pump Upgrade

The Maintenance department did a great job in restoring the bypass pump that is located on McNair Boulevard at Pump Station 28. The pump was rusted, and had some wear and tear from being outside for 3 years. By the time the employees were through with the repair, they had it looking like new!

Update: Water Main Extension Project Underway

The Authority has officially began construction on the transmission system expansion project. The project extends from the intersection of Humphrey Road and Old Ft Bayou Road in Vanleave, and terminates at the intersection of Gibson

Road and Highway 90 in Ocean Springs. Employees passing through this area should plan accordingly as traffic delays could be expected. This project is the first phase of a multi-phased project and phase 1 is scheduled to be

completed in August 2018. Should employees have questions or comments involving the project, please feel free to contact the JCUA Engineering Department.

WELCOME ABOARD!
