

## Happy Birthday!

- Doug Boler
- Mark Erickson
- Torey Fountain
- Armond Harvey
- Josh Hill
- Carmen Huckleby
- Ed Stewart
- Brandon Stork
- Don Taylor
- Amy Thompson
- Joe Watrous
- Dan Westerdahl

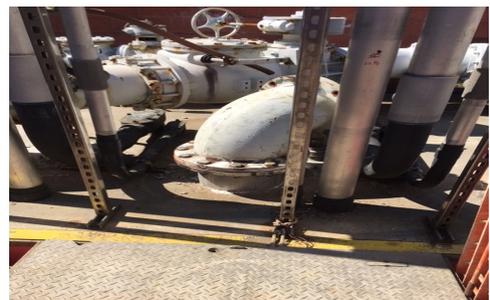

## J. Martin Receives Civil Engineering Degree

Jerod Martin began his career at the Jackson County Utility Authority in January of 2011. He started as a Class D water operator for the entire water system west of the Pascagoula River. In July 2013, Jerod was offered a fantastic opportunity in the Advanced Water Operator Apprenticeship Program, which allowed him to attend the University of South Alabama Engineering Program. In May 2018, he completed the program and graduated with a Bachelor of Science in Civil Engineering. To ice the cake, he passed his Fundamentals of Engineering exam on his first attempt in the middle of studying for Final Exams. He will begin working closely with the Engineering Department while continuing to play a major role in the Water Department. Jerod, this is truly a major accomplishment that will prove beneficial for the rest of your life. Your hard work and dedication paid off. Congratulations! You have earned it!

## Pump Station Rehabilitation Completed

As mentioned previously in the month of April, Pump Station 26 has been under rehabilitation and was recently just completed. Our crews set up the bypass pumping and installed new valves at the station, plus other miscellaneous items. So, thank you to all of our employees who assisted in this rehab and for the long hours that you put in to accomplish this task. The Pump Station now looks pristine and your work is greatly appreciated. Below are some pictures of the completed project renovations:

**Congratulations to Zach Mobley on being selected for the Metrologist-Database and Instrumentation specialist position!**
