Jackson County Utility Authority

River Road Restoration

The Operations and Maintenance Departments have worked to restore the River Road force main bridge crossings in Pascagoula and Moss Point. The restoration project included installing new ARVs, repairing pipe joints, and applying new paint. The improvements to the bridge crossing will preserve the aging infrastructure, therefor prolonging replacement. The Authority was able to keep this project in-house, in hopes of economical savings. Please see before and after pictures below:

We just launched our new online applicant tracking system! All jobs will now be posted here for all internal and external applicants to apply. You can apply through ESS or the link on JCUA's website.

Wastewater Improvements

West Jackson County Operations and Decentral Operations worked to clear new easement for the SRF wastewater improvements.

Service Award

Recipients:

Amy Thompson-5 Years

Congratulations to
Chase Glisson on
the birth of a
