**JCUA WATER SYSTEMS ACHIEVE PERFECT SCORE**

The Jackson County Utility Authority is pleased to announce that both its East and West Jackson County Water Systems have received a perfect “5.0” rating from the Mississippi Department of Health on its most recent annual assessment.

The 5.0 rating signifies that the JCUA meets and exceeds all managerial, technical and financial requirements set forth by the State of Mississippi for public water systems.

Since their completion and being placed in operation as a result of Hurricane Katrina grants and directives, both the JCUA East and JCUA West Water Systems have received a perfect “5.0” overall capacity rating which reflects the attention to detail and the dedication of JCUA’s management, staff and the employees who diligently work on a daily basis to insure the outstanding operation of the water system.

The water system was financed and paid for by Community Development Block Grants given to the State of Mississippi as a result of the Hurricane Katrina Projects championed by former Governor Haley Barbour and administered by the State of Mississippi. The water system currently supplies water to parts of Ocean Springs, the Helena Utility District, and to the retail water operations of the JCUA.
